Para:

Dear Dr. Pérez-Peraza,

We are planning to publish a number of Special Issues in our journal

Advances in High Energy Physics

(<http://www.hindawi.com/journals/ahep/>), and I am writing to invite you to be the Lead Guest Editor for a Special Issue on a topic of your choice. The topic of the Special Issue must be a topic of high current interest, broad enough to attract a reasonable number of submissions, but at the same time narrow enough to keep a strong focus for the Special Issue.

The most recent Impact Factor for Advances in High Energy Physics is 4.522 according to 2011 Journal Citation Reports released by Thomson Reuters (ISI) in 2012.

As the Lead Guest Editor, your main responsibilities will be inviting 2-3 Guest Editors, writing a one-page Call-for-Papers in consultation with the other Guest Editors, assigning the incoming submitted manuscripts to yourself or the Guest Editors so they can send them for peer-review, and co-authoring an editorial with the other Guest Editors to be published as an opening to the Special Issue. Special Issues are made freely available online to all interested readers leading to the maximum possible dissemination and recognition within the scientific community.

Our staff will provide you with as much administrative and editorial assistance as possible to make sure that the whole process is as seamless and rewarding as possible for the editors, authors, and reviewers alike.

I will be happy to provide more details if you are interested in being the Lead Guest Editor for one of our upcoming Special Issues in Advances in High Energy Physics.

I look forward to hearing from you.

Best regards,  
Shereen
