

Dear Dr. Perez-Peraza,

My name is Maram Hamissa and I am a Journal Developer for the Hindawi Publishing Corporation. I am writing to invite you to join the Editorial Board of The Scientific World Journal as part of the journal's High Energy Physics subject area. The Scientific World Journal is a peer-reviewed, open access journal covering a wide range of subjects in science, technology, and medicine. The journal has been published since 2000, and it currently has an Impact Factor of 1.524.

Hindawi has taken over the publication of The Scientific World Journal, and we are currently in the process of expanding its Editorial Board. The journal will be run using a collaborative editorial model which is designed to provide a fast peer review process for all submitted manuscripts. The journal will be edited by a distributed Editorial Board which is organized into subject areas that correspond to the different research areas covered by the journal, and it aims for an average review time of 4 weeks from submission until a final decision has been reached.

Manuscripts that are submitted to the journal will be sent to a number of Editorial Board Members (typically each manuscript will be sent to at least 5 Editors), who will have two weeks to provide either a recommendation for the publication of the manuscript, along with a written commentary detailing any improvements that the authors should make to their manuscript, or a written critique of why the manuscript should not be published.

After the two-week period has elapsed, if the majority of the editorial evaluations recommend the manuscript be rejected, the manuscript will be rejected right away. If all the editorial evaluations that are received recommend that the manuscript be accepted for publication, the manuscript will be accepted. Otherwise, the editorial evaluations that were submitted will be anonymously communicated to all of the Editors who participated in the peer review process. Each Editor will then be given an additional week to review the feedback of the other Editors and to either confirm or revise their earlier editorial recommendations. If the majority of the editorial evaluations that are received by the end of this second round of review recommend the manuscript be accepted for publication, the manuscript will be accepted. Otherwise, the manuscript will be rejected. If the manuscript is accepted for publication, the names of the Editors who recommended the publication of the manuscript will be published alongside the manuscript. More information on the journal is available on the following web pages:

<http://www.tswj.com/>(TSWJ Home Page)

<http://www.tswj.com/workflow/>(Workflow)

<http://www.tswj.com/editors/hep/>(Editorial Board)

The journal will be published using an open access model, which allows disseminating scholarly articles by removing the access barriers imposed by the subscription model, in order to make the full-text of all published articles freely available for any interested reader. In this model the publication costs of an article are covered in the form of Article Processing Charges, which are publication fees paid from the research budget of accepted authors. In this model authors retain the copyright of their work, and we make every possible effort to ensure that the full-text of every published article is both visible and accessible to all potential readers.

Manuscripts that are submitted by the members of the Editorial Board of The Scientific World Journal to the journal will automatically receive a 50% reduction in their Article Processing Charges.

Please do visit the web pages above and let me know if you have any questions or comments. We hope you will accept to join the Editorial Board of the journal and I will be looking forward to hearing from you soon.

Best regards,

Maram Hamissa
